

THE BIOCODEX MICROBIOTA INSTITUTE

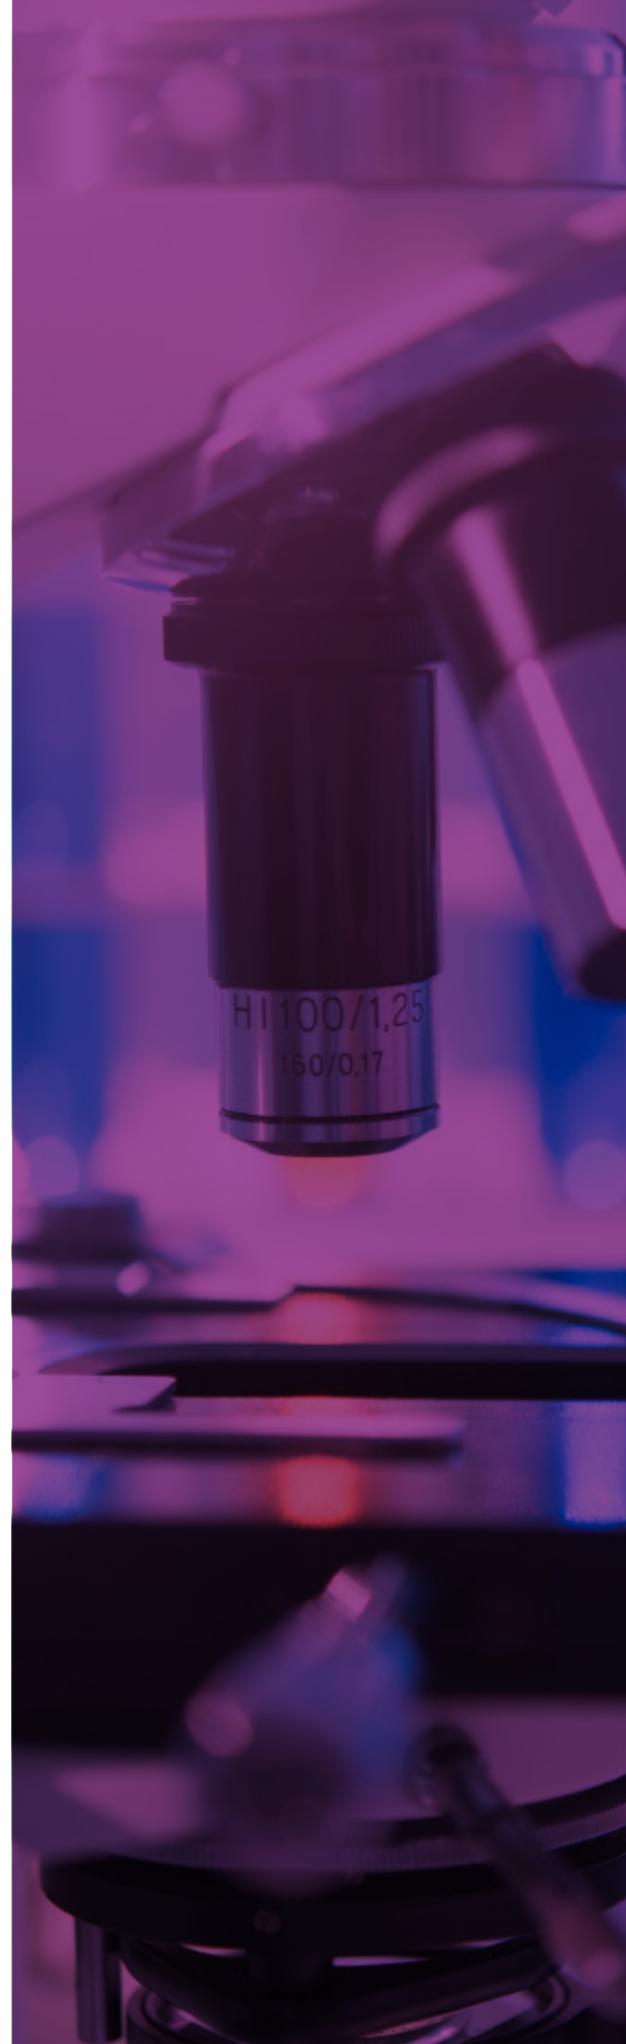

For more than six decades, Biocodex has built a dual reputation as both a pioneer and leader in microbiota research and understanding, specifically with the discovery and worldwide sale of the probiotic *Saccharomyces boulardii* CNCM I-745.

AN INTERNATIONAL PLATFORM FOR KNOWLEDGE

Driven by a desire to encourage scientific information and to spread educational content about the microbiota, Biocodex has created the Biocodex Microbiota Institute, an institute of knowledge and understanding driven by research.

An institute whose goal is to place information at the fingertips of health professionals and the general public. The scientific content comes from an international scientific body of research and subsequent scientific publications and upon launch will be available in 3 languages: French, English and Spanish.

The mission of the Biocodex Microbiota Institute is to increase general awareness of the importance of the microbiota. To aid its mission, the Institute will provide a suite of dedicated information tools (websites, social media, newsletters, brochures, etc.) the content of which will be regularly updated to efficiently inform and educate health professionals and lay people alike about the microbiota and advances made in research.

INITIAL RESOURCES

A website www.biocodexmicrobiotainstitute.com with two levels of access:

- 1** **The general public** will have access to information in lay terms and educational content in the form of videos and infographics with the goal of conveying knowledge and aiding understanding.
- 2** **Health professionals** will have access to the latest scientific news, interviews with experts, newsletters, as well as relevant conference proceedings.

- 3** **A periodic newsletter, "Microbiota"**, will be published for health professionals.

- 4** **Our Twitter account, @Mycrobiota, and Facebook page, Mycrobiota Biocodex Institute**, will continuously report current news on our understanding of the microbiota and ongoing research.

- 5** **Gut Microbiota: A full-fledged organ**, a recent French publication sponsored by Biocodex, is now available in English. The publication reports the latest news on what researchers now considers to be a fully defined separate organ. The publication further confirms the role that Biocodex plays as a leading laboratory dedicated to the dissemination of knowledge of the microbiota.
